

# Atlanta PAS 24

## Door Handle

- Supplied as Monobloc Outer and Quick Fit Inner
- One length backplate with two fixing centre variants
- 92mm PZ centres
- Supplied with special spindle and M6 hardened screws finished to match backplate
- Fixing bolt and cylinder cover provide added protection
- Sculpture backplate to resist gripping
- Reversible handing

The Atlanta PAS 24 A2:2012 features non-croppable fixing bolts which are designed to increase strength of the handle when fitted. Alongside the M6 hardened screws and special high security 'super' spindle, the handle is fully tested to the latest PAS 24 requirements.

The external backplates are manufactured from solid aluminium extrusion providing further strength, while the sculptured edges of the backplate help to resist gripping and therefore attack.

The high security door handle is supplied with a sliding cylinder cover to protect against attack and is adjustable to suit various cylinder lengths.

### Application:

The lever/lever handle set is for use with lift lever operated multipoint locking mechanisms with a 92mm PZ centre with a choice of type A (short) or B (long) backplate to suit the door lock fixing centres. These are the same fixing points as the standard Atlanta handle, making the handle ideal for retro fitting to add security.

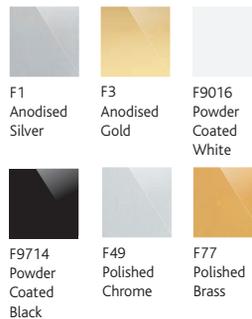

**Monobloc** = Handle levers are supplied fixed to backplate.

**Quick Fit** = Patented handle fixing design. Handle set can be fitted in as little as 8 seconds. Levers are supplied separate from backplate.

### Technical Information:

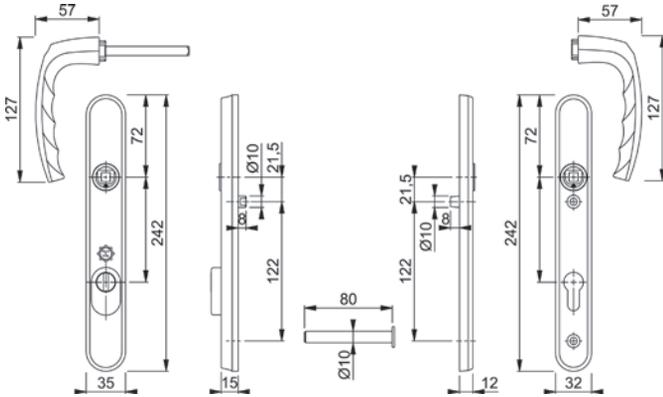

- Solid aluminium extrusion external backplates to provide added strength
- Cast aluminium lever
- Spindle: 8mm<sup>2</sup> x 140mm
- Hardened screws: 1 x M6 x 80mm
- 1 x Fixing Bolt

### Colours:
