

# Hoppe ARRONE Pull Handles

## Stainless steel pull handles for timber and composite doors

Pull handles from the long established Hoppe ARRONE brand offer inline and offset (cranked) design with a stylish brushed stainless steel finish.

Bolt through or back to back fixing options are available to suit the application with all fixing screws supplied as required to suit timber doors.

The range stocked by Carl F Groupco are for door thicknesses of 44 - 54mm in a variety of lengths to suit to desired look.

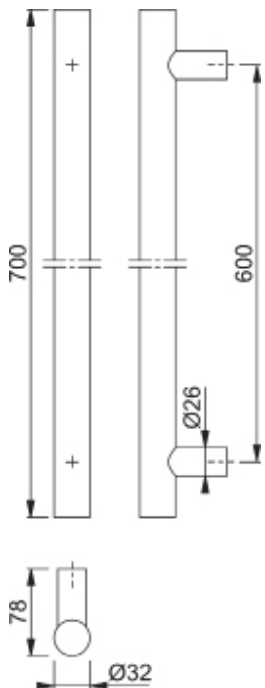

Suite with key wind up or automatic door locks such as the FUHR 833 or Yale AutoEngage.
