

Shootbolt Window Lock

Versatile and secure, this window lock is suitable for uPVC, aluminium and timber profiles and comes as either a croppable or extendable variant.

The Shootbolt Croppable covers all window sizes from 326mm to 1420mm with just four rod sizes and offers high security shootbolt performance with a minimal number of components.

The Shootbolt Extendable covers window sizes from 476mm to 1520mm without the need to cut the shoot bolt extensions. This non-cropping window lock combines high security shootbolt performance with the efficient manufacturing Yale is known for.

On both versions of the shootbolt, the adjustable mushroom cams provide increased anti-separation performance, together with simple compression adjustment and there is also a night vent option available on the flush casement.

Features:

- High security shootbolt system
- 4 crop-to-fit shootbolt rod sizes
- Shootbolt Croppable suitable for window sizes ranging from 326mm to 1420mm
- Shootbolt Extendable suitable for window sizes ranging from 476mm to 1520mm
- 20mm or 22mm backset variants
- Suitable for use on uPVC, aluminium and timber profiles
- Shootbolt flush sash options available
