

FUHR 841

Timber & Composite French Slave Lock

- 20mm Faceplate on Master
- 26mm Faceplate on Slave (841)
- Adjustable locking points
- For door heights from 1930mm – 2500mm
- FUHR silver corrosion resistant surface finish
- Lever or split spindle operation

The 841 is a concealed lever operated 2 part slave lock which is suitable for use with Timber and Composite French Doors. Shootbolts operated by a lever in the faceplate secure the slave leaf to the frame.

This special slave door lock also operates as a keep into which the Master Leaf is locked.

The Master lock is a 2 part lock which is compatible with the 841. All locking points are adjustable, including the shootbolt keeps to ensure maximum security and weather sealing.
