

# FUHR Door Locks

## 856

### Type 4, Type 8, Type 14 & Type 15

- Reversible latch and deadbolt
- Variable handle height – supplied at 1020mm (Type 4 & 8) or 1050mm (Type 14 & 15)
- Corrosion resistant "Silver" plated surface
- Profile related locking plates

FUHR MultiSafe multi-point door locks are renowned for their ease of use, reliability and durability. Profile specific keeps ensure secure fastening to the outer frame. Lever/Lever action is a very simple means of operating a door lock – when the door is unlocked, depress the lever to release all locking points. Lift the lever to engage the main locking points then turn the key in the profile cylinder to throw the central deadbolt and to deadlock all other locking points.

The Type 8 features two round deadbolts and two roller cams, giving secure locking, the tapered round bolt nose ensures easy operation and good weatherseal compression. Where security is a greater concern on main residential door, the Secured by Design accredited Types 4, 14 and 15 with hook locking are recommended. The hooks engage into pressed steel profile related locking keeps.

The Type 14 and 15 "Trade Locks" are designed to be highly price competitive. The hooks are smaller than the standard FUHR hooks whilst still resisting forced entry and offering the same throw. With less than 180mm between the hook and roller, the hook takes none of the load when compressing the weather seal as the door is closed; this ensures that the operation of the lock remains simple and reliable with minimum force. The total distance between the outer locking points is larger than standard locks to ensure that the corners are protected, serrations on both ends of the faceplate provide the opportunity to add additional shootbolt locking points.

Description	Part Code	Box Qty
<b>FUHR 856 Type 4 –35mm</b>		
4 Hooks, Latch & Deadbolt	M6352DF450	5
