Call:

- Four anti-lift hook locking points
- One piece keep
- Anti-slam as standard
- FUHR silver corrosion resistant surface finish

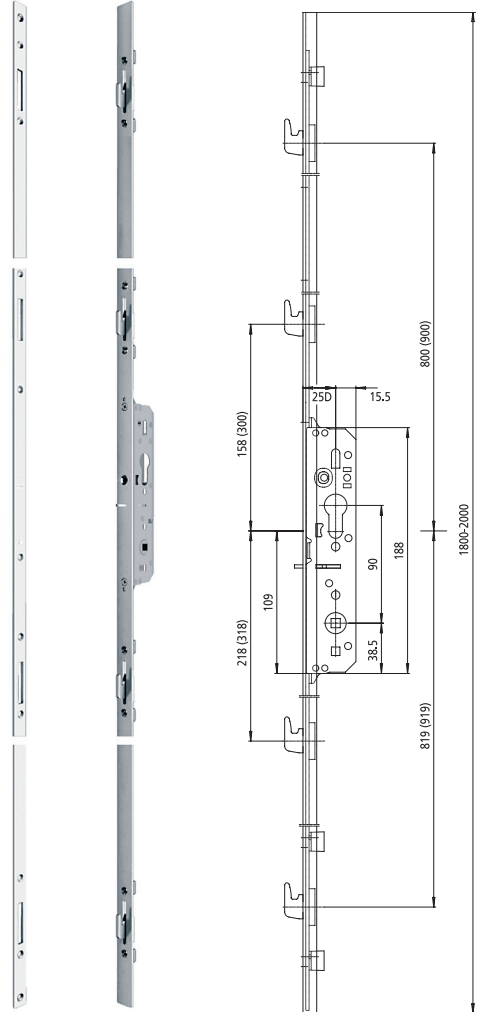

Designed to suit conventional British inline sliding patio doors, the anti-lift hooks move upwards to prevent the closed door from being lifted from the track when under attack.

System specific one piece keeps self-locate to ensure accuracy.

FUHR inline patio door lock and keep sets are available for all major profiles.

Technical Information:

- Backset: 25mm
- Centre: 90mm
- Spindle size: 7mm
- Clearance required behind backset: 15.5mm
- Faceplate: 16 or 20mm
- Overall length: 1800mm
