

L Series Vent

- Bottom operated
- Controllable
- Slimline
- Integral fly screen
- Available in a range of colours including mixed internal and external parts

This slim line vent design is ideal for use for low profile window frames and they only require a slot 10mm high.

The internal units are operated with a bottom mounted controller for a positive seal.

The shutter can be removed for permanent ventilation while the external unit includes an integral fly screen.

2000L internal

4000L internal
