

ARRONE AR3500

Door Closer

- Suitable for use on doors 1100mm and 80kg maximum weight
- Universal application
- Adjustable closing speed/latch operation
- Tested to controlled door closing devices standard BS 1154:1997

Successfully tested to European performance and fire safety standards, the ARRONE AR3500 series combines style and elegance, coupled with an exacting performance.

The designer unit is suitable for doors up to 1100mm wide and 80kg weight when fitted. It is suitable for light frequency commercial applications, especially fire doors where performance and reliability is essential.

There are two variants of the ARRONE door closer, the standard version is designed to be fitted to the pull side of the door. The other version is suitable to be fitted to the push side of a door with a fold flat arm.

Testing and Accreditation:

- Successfully type tested for conformity to all requirements of BS EN 1154:1997
- Fire test to BS EN 1634 Part 1: assessed for use on FD30, FD60 and FD120 timber fire doors and 240 minutes on steel doors
- CE Marked – Certificate 1121-CPD-AD0009
- Certifire Approved Product: Certificate CF294
- CPR Declaration of Conformity Certificate HuK0019
