

Trojan Pegasus Espagnolette

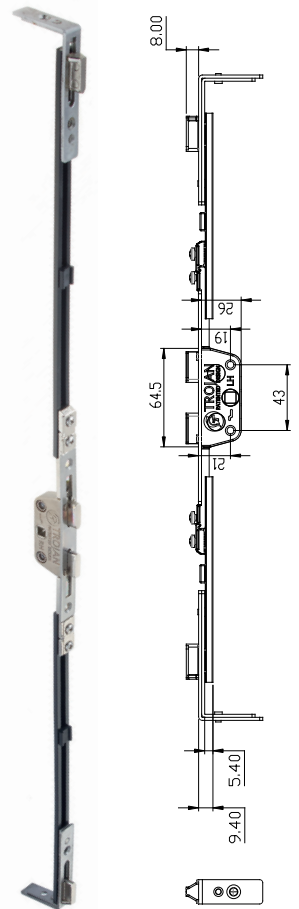

- Extremely simple and fast installation
- Offset handle heights possible with standard lock
- Bi-direction spade design locking points

Suitable for PVCu and profiles with a standard Eurogroove application, the Pegasus window lock offers rapid installation with ultimate security.

Purchasing costs can be significantly reduced as the one product can be used for most applications, including offset handle heights. This can provide simpler budgeting and also less risk for stocking hardware which is in less demand.

The Pegasus window lock provides PAS 24 security, even in the night vent position. The 20mm reverse locking action on this multipoint lock enhances the night vent for a higher level of security.

The spade locking points allow 20mm of engagement which spreads the load. The bi-directional locking points are positioned in the centre and on the corners to provide maximum protection against jemmying.

Technical Information:

- Backset: 21.5mm
- Gasket compression adjustment: up to 0.75mm
- Faceplate width: 16mm
- Sash rebate size range: 400mm – 1800mm
- Salt spray tested to BS EN 1670 480hrs
