

# Virage Cranked Espagnolette Handle

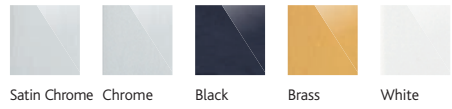

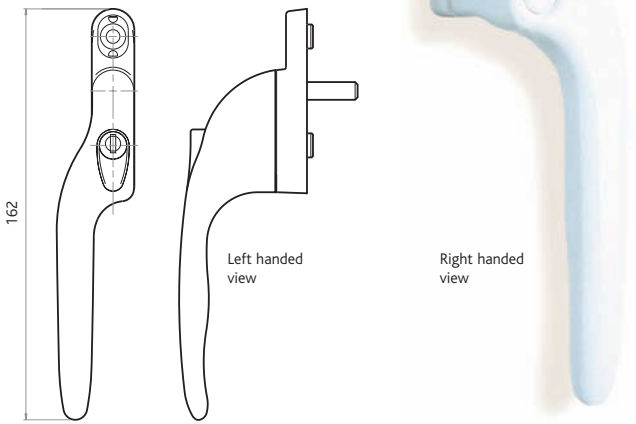

- Push button to open
- Handle latches automatically when closed
- Cylinder can be deadlocked with the key
- Locking and Non-locking versions
- Concealed fixing screws
- Right and left handed

The cranked design enhances the ergonomics of the Securistyle Virage handle allowing increased knuckle clearance. The cranked feature means that the handles are left and right handed which needs to be specified on order.

The handle is approved by Secured by Design offering additional security to the window. Non-locking versions are available for use with emergency escape as well as a green button for use with egress windows
